OBJECTIVE

An aspiring IT professional passionate about **Backend Development and Full-Stack development**, with hands-on experience in MERN stack and AI-based projects. I had also solved many **Data Structures and Algorithm** question. Actively seeking internship/full-time opportunities where I can contribute to impactful software products.

SKILLS AND INTERESTS

Programming Languages	JavaScript, Java, Python, C/C++
Frontend/Backend	Next js, React js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Flask, Django
Database	MySQL, PostgreSQL, MongoDB, NoSQL, Firebase
Tools & Platforms	Postman, Artificial General Intelligence, JWT, VS Code, Amazon AWS, WebSockets, Git, GitHub, Vercel

EDUCATION

Master of Computer Applications MCA	Aug 2024 - July 2026
Madhva Institute of Technology and Science, Gwalior, Madhya Pradesh	
Bachelor of Computer Applications BCA	July 2021 - June 2024
Jiwaji University, Gwalior, Madhya Pradesh	

EXPERIENCE

- Full Stack Developer Internship | Cepia Labs** Oct 2025 - present
- Completed structured training in **full-stack web development**, covering **frontend (React.js, Next.js)** and **backend concepts**, with emphasis on real-world application development.
 - Built and optimized **dynamic Next.js components**, enhancing **UI performance, responsiveness, and user engagement**.
 - Collaborate with functional teams who carry out the detailed investigation into software requirements and Conferring with project managers to obtain information on software capabilities.
 - Contributing to real-world projects under mentorship and collaborating within a professional development environment.
- MERN Stack Developer Intern | WETEAMRK7** Aug 2024 - Feb 2025
- Built a fully functional and well-structured database architecture that significantly reduced dependency on third-party services by **60%**, improving data reliability, performance, and long-term system stability.
 - Modifying software to fix errors, adapt it to new hardware, improve its performance, or upgrade interfaces.
 - Designed responsive and user-friendly interfaces using React.js and Tailwind CSS, improving usability and overall user experience through a mobile-first and component-driven design approach.

PROJECTS

- AI Interviewer [Live](#)**
- Developed an AI-powered live mock interview platform** using the Cohere API, capable of generating fast, context-aware responses, handling cross-questions intelligently, and adapting dynamically to user behavior during interviews.
 - Implemented a real-time coding interview environment**, allowing users to write and test code during interviews, closely simulating real technical interview scenarios.
 - Built an AI avatar with face-swapping and expression logic**, dynamically rendering character images based on mouth states (open/close) and phonetic cues to create a realistic and interactive interviewer experience.
 - Integrated an AI-based proctoring system**, analyzing user facial expressions and behavior during interviews to detect potential cheating and assess candidate authenticity in real time.
- Exam Pro [Live](#)**
- Designed a complete exam simulation platform, implementing end-to-end functionality from admin management to user workflows, including subscriptions, coupon codes, and exam access control.**
 - Created a real-exam-like MCQ practice environment**, helping users familiarize themselves with exam layouts, time pressure, and navigation patterns commonly faced in aptitude tests.
 - Improved exam readiness and confidence**, reducing user fear of aptitude exams by approximately **50%** through repeated practice in a realistic and structured testing environment.

CERTIFICATIONS & ACCOMPLISHMENTS

- LeetCode : 500+ questions solved
- GDG certificate of participation

HOBBIES AND INTEREST

- Chess,Badminton
